

Course: AD Innovation Lab

credits: 10

Course code BVVH25ADINLAB
Name AD Innovation Lab
Study year 2026-2027
ECTS credits 10
Language English
Coordinator V. Diderich-Georgievska

Modes of delivery Action learning
 Guest lecture
 Individual supervision
 Peer feedback
 Project-based learning
 Simulation
 Supervision

Assessments AD Innovation Lab - Professional product

Learning outcomes

1. The student is able to make and develop an integral architectural design for a building within a known, complex practical context in a methodical and substantiated manner. 40% _ level 2 _ Design / Integral problem solving ability
2. The student is able to formulate research questions in relation to a spatial issue for the benefit of the built environment in a personal project plan. 40% _ Level 2_ Investigations / Critical Thinking Skills
3. The student is able to present the results of the research and the design process in words and images by communicating relevant information regarding the scale and the elaboration level. 20% _ level 2 _ Communication / Collaboration ability

Content

Design and research. With a self-chosen guideline, the student works on integral issues in a, preferably, multidisciplinary context. In the first weeks of the minor, the student formulates his question and research method in the form of an action plan.

Areas of interest: spatial planning and design, buildings and technology, people and society, applied research and communication.

Included in programme(s)

Built Environment Exchange Architectural Design (autumn)
 Built Environment
 Minor Architectural Design

School(s)

Arts, Design & Built Environment
