

Course: Procedural Assets level 2

credits: 5

Course code	GTVB24ELPA2	Modes of delivery	Tutorial
Name	Procedural Assets level 2	Assessments	Procedural Assets level 2 - Other assessment
Study year	2026-2027		
ECTS credits	5		
Language	English		
Coordinator	I. Plutschouw		

Learning outcomes

Learning Outcomes

For this elective level 2, students have to write 5 personal learning outcomes that adapt to their level, development needs and the CMGT LOLs. The learning outcomes have to be approved by the lecturer of the course.

Content

Procedural generation using algorithms is an effective way of using available computing power to create unique assets, levels, worlds or even universes. This elective focuses on teaching students about the different methods of procedural generation available, how to use these methods and how these methods can help in creating unique experiences.

The student will learn to set up their own use-case and implement specific learning goals. Starting with the exploration of the application and boundaries of a technique and the relevant software. First by replicating examples of procedural techniques and later applying different techniques in their own use-case. The solution to the use-case will be achieved by weighing the pros and cons of possible solutions and making the right design choices. These design choices are showcased in a presentation.

The student will build a product that consists of multiple procedural generation methodologies (noise, scatter, parametric etc). The specific product can be a scene that is procedurally generated or a tool that can be used to create new procedural created assets (city builder etc.). The assessment product will be a showreel video of the product suitable for the professional portfolio.

The entry requirement for this elective is that the student has passed level 1 of the elective.

Included in programme(s)

Creative Media & Game Technologies
CMGT Exchange Minor Game Design & Development 2

School(s)

Arts, Design & Built Environment
