Learning outcomes

PLO1: International Business Opportunities

In this course, the student develops an intermediate understanding of financial and economic concepts to evaluate how firms create and sustain value through financial decisions.

Learning Line: Economics, Finance & Accounting:

CLO1: The student can use managerial finance concepts to assess the financial environment and firms' financing choices in an international business context.

CLO2: The student can explain fundamental economic concepts, describe how markets operate, and analyse the effects of economic events on organisations and stakeholders.

PLO2: Business Transformation

In this course, the student learns to apply intermediate financial and economics insights to contribute to responsible, data-informed business transformation.

Learning Line: Economics, Finance & Accounting:

CLO1: The student can apply financial analysis, working capital management and capital budgeting techniques to identify opportunities for improving sustainable business performance.

CLO2: The student can interpret economic trends and evaluate their implications for business operations and future opportunities.

Content

This course combines intermediate finance and economics to analyse how organisations create and sustain value through informed financial decision-making and an understanding of market dynamics. Students develop skills in working capital management, capital budgeting, and the interpretation of economic trends to assess business performance and future opportunities. The course supports entrepreneurship by strengthening data-driven evaluation of investment and growth options. It connects to sustainability and social impact through its focus on long-term performance and responsible resource allocation, aligning most strongly with SDG 8 (Decent Work and Economic Growth) and SDG 12 (Responsible Consumption and Production).
