

Course: Creative Writing

credits: 5

Course code	LSVX24CREATIEF
Name	Creative Writing
Study year	2026-2027
ECTS credits	5
Language	Dutch, with parts in English
Coordinator	M.A. Noback

Modes of delivery	Assignment Tutorial
Assessments	Creative Writing - Other assessment

Learning outcomes

This module has the following learning outcomes:

You give effective and constructive feedback on others' work and incorporate feedback given into your own work.
You know the different narrative perspectives and basic writing techniques and apply them in your own work.
You write short stories in the genre prose.

Content

In this module we are going to give the creative muscles plenty of room! The central topic of this module is the short story. Through many exercises and assignments, we will explore different approaches to writing stories. We will explore a number of important concepts such as narrative perspective, "show, don't tell," exposition, sensory writing and suspense.

Through much reading, discussion and listening to each other, you will learn to look critically at texts and sharpen your own work.

You will conclude the module with a final project, a short story.

Prior knowledge or experience is not required for this module, only the desire to learn to express yourself creatively in written word.

A nice bonus: your scientific writing and observation skills will definitely improve as well!
