

Course: Practice Based Research 2

credits: 10

Course code	MUVM26PBR2	Modes of delivery	Individual supervision
Name	Practice Based Research 2		Teaching method 1
Study year	2026-2027		Teaching method 2
ECTS credits	10	Assessments	Portfolio assessment 2 - Portfolio assessment
Language	English		
Coordinator	J. Maldonado Álvarez		

Learning outcomes

3.1 Students are aware of developments in their specialist field, the wider professional music world and society at large. Students demonstrate how they integrate that awareness into their professional abilities and use it to enhance their own career and to serve the community.

4.3 Students reflect on their own working methods, and understand the implications of choices and decisions, which they can explain retrospectively both to colleagues and to individuals working outside the field.

4.6 Students conduct research in a structured manner on issues that are connected to their professional practice.

Content

The aim of the Practice-based Research (PBR) course is to foster your curiosity and inquisitive attitude, and to learn basic research skills that help you to develop your professional practice. When working towards your goals several questions may emerge. These might be artistic questions, entrepreneurial questions or questions related to psychological or social issues. The PBR course helps to explore such questions in a systematic way, and to reflect on the relevance of various sources for practice and research.

Therefore, the aims of the PBR course are:

- To develop an appropriate method of following developments in the professional field and society in a structured way
- To develop a reflective attitude and research skills as tools for the development of practice
- To develop (your) professional practice using a research-informed approach

To do this, you learn:

- How to form useful research questions
- How to conduct a literature search that informs your research project
- How to conduct your research in a systematic way using an appropriate methodology
- How to analyse the information that you find in your research
- How to share your research findings with others in writing and speaking.

In semester 2 you explore your research topic using the chosen data collection. To deepen the understanding of your topic and available sources you go through several (guided) cycles of action-and-reflection. The results of your research activities, including the research data that you have collected so far with some initial reflections on the findings, are collected in your portfolio. If there are changes in your plans which concern your research you also describe and explain these changes.

Included in programme(s)

Master of Music
Master of Music, Exchange (year)

School(s)

Arts, Design & Built Environment
