

Vak: Operations Management 3

credits: 2

Vakcode	BKVH03OPM3	Werkvormen	Onderwijs
Naam	Operations Management 3	Toetsen	Operations MM 3 - - Opdracht
Studiejaar	2020-2021		
ECTS credits	2		
Taal	Nederlands		
Coördinator	S.G. Tjemkes		

Leeruitkomsten

The student is able to:

- LO1: As an independent person, recognize operational problems within an organisation or supply chain, analyse the problem and design solutions and is able to advice on the implementation.
- LO2: Search and apply the necessary theory (including contemporary publications) to support the analysis, design and implementation.
- LO3: Present a written advice and do an oral presentation of the project/assignment.

Inhoud

The theme in this block (2.3) is "Support and Commitment". The course zooms in on operations- and supply chain management and at the same time zooms out and dealing with contemporary topics. In this module the main focus is on creating value in the supply chain. In OPM1 Operations Management is explained (block 1.3), and in OPM2 Supply Chain Management is explained (block 2.1). In this block we take the Value Chain Management point of view and include contemporary topics like: Sustainability, Robotics, Smart Factories and more. The course Operations Management 3 (Value Chain Management) has the objective to teach theory and link this to practise. This is done in the lectures and in the practical assignment (PO2). The course is delivered on the end-level (level 3) that means that this will include a high level of complexity and also a high level of selfmanagement of the student.
