

Vak: Databases

credits: 2

Vakcode	ELVH16ADB	Werkvormen	Hoorcollege
Naam	Databases		Opdracht
Studiejaar	2021-2022		Practicum / Training
ECTS credits	2		
Taal	Engels	Toetsen	Databases - Opdracht
Coördinator	M.S.R. van Noordennen		

Leeruitkomsten

The student:

- understands the concepts and applications of databases;
- designs a relational database for storing and retrieving data using e.g. MySQL;
- creates a program that queries and updates data stored in a relational database.

Inhoud

Being able to store large amounts of data in a structure way is becoming more and more necessary. In this course you will learn about how to design and implement a database that is able to store the data of a specific application/system in a structured way. Next to making the database you will write a program in Java that is able to talk to this database. You will be able to add/change/remove and request data in the database. All these skills will be needed for a large assignment.
