

Vak: Preparatory Course Datascience 1

credits: 5

Vakcode	BFVM23PREPDATSC1
Naam	Preparatory Course Datascience 1
Studiejaar	2026-2027
ECTS credits	5
Taal	Engels
Coördinator	-

Werkvormen	Werkcollege
Toetsen	Preparatory Course Datascience 1 - Schriftelijk, organisatie ToetsCentrum

Leeruitkomsten

- You interpret mathematical notation.
- You apply basic equations analytically, including linear, rational, quadratic, trigonometric, exp/log equations in one variable.
- You execute differentiation and integration of standard functions in simple forms.
- You understand basic matrices operations

Inhoud

In this course, you will revise basic mathematical skills and knowledge in the fields of calculus. This is one of the three optional modules of the Preparatory course. It's intended for students without a sound background in mathematics. The basic mathematical skills are a required level for the data sciences subjects.

Opgenomen in opleiding(en)

Master Data Sciences for the Life Science

School(s)

Engineering, Life Sciences & ICT
