Leeruitkomsten**PLO1: International Business Opportunities**

In this course, the student develops a basic understanding of economics and research methods to explore how markets function and how external factors influence international business.

Learning line 1: Economics, Finance & Accounting

- CLO1: The student can explain fundamental economic concepts, describe how markets operate, and analyse the effects of economic events on organisations and stakeholders.

Learning line 2: Research & Data Analytics

- CLO2: The student can apply basic statistical and digital tools to collect, organise, and interpret business and economic data to support conclusions about business and market developments.

PLO2: Business Transformation

In this course, the student learns to apply basic economic and research insights to inform responsible and data-based business decision-making.

Learning line 1: Economics, Finance & Accounting

- CLO1: The student can interpret economic trends and evaluate their implications for business operations and future opportunities.

Inhoud

This course introduces students to basic economics and research methods to understand how markets function and how economic factors influence international business. Students learn fundamental economic concepts, global macro-economic drivers, and the operation of key markets, alongside basic statistical techniques to analyse economic data and trends. The international focus supports the development of a global mindset by strengthening understanding of cross-border economic dynamics. The course connects to sustainability through its emphasis on economic development and responsible, data-informed decision-making, aligning most strongly with SDG 8 (Decent Work and Economic Growth).
