

Vak: Graduation Assignment

credits: 15

Vakcode PIVB25ASO
Naam Graduation Assignment
Studiejaar 2026-2027
ECTS credits 15
Taal Engels
Coördinator A.J. Beetsma

Werkvormen Individueel
Werkcollege
Toetsen Graduation Assignment - Professioneel
product
Presentation/CBI - Eindgesprek

Leeruitkomsten

- Under the supervision of a lecturer, the student can develop a research plan to answer a physiotherapy-relevant research question. Professional role IP, level 3.
- Under the supervision of a lecturer and in collaboration with third parties, the student can design and conduct a practice-based research project or literature review. Professional roles IP, ORG, SWP, level 3.
- Under the supervision of a lecturer, the student can write a Bachelor thesis. Professional role IP, level 3.
- The student is able to professionally share the background, method, and results of a practice-based research project or literature review with third parties, through a short presentation/pitch. Professional role COM, level 3.
- The student is able to reflect on the research assignment and the learning process they have experienced. Professional role IP, RP, level 3.

Inhoud

During this course, students work on a graduation assignment that requires applied scientific/practice-oriented research. The graduation assignment is related to the physiotherapy domain and the aim is to have students work on an assignment from the field. Knowledge and skills acquired in R&I courses are applied at the final level while working on the graduation assignment.

In the first half of the course, students work on a research plan. This is submitted for feedback halfway through the trajectory. In the second half of the course, students carry out the research and the results are recorded in the form of a Bachelor's thesis. The course is concluded with an individual final presentation followed by a criterion-based interview.

Admission requirements:

To be admitted to the Graduation Assignment, students must have completed all educational units from the first and second year of study. In addition, O&I from year three must have been successfully completed. Finally, internship 1 must have been completed.
