

Vak: Pt-care 9: Physiotherapy and Adults

credits: 10

Vakcode PIVB25PC9AD
Naam Pt-care 9: Physiotherapy and Adults
Studiejaar 2026-2027
ECTS credits 10
Taal Engels
Coördinator A.J. Beetsma

Werkvormen Hoorcollege
Practicum / Training
Werkcollege
Toetsen Portfolio - Portfolio assessment
Practical - Performance assessment
Presentation - Presentatie

Leeruitkomsten

3CD-E/FH. 41. Based on a case description, the student can independently draw up a physiotherapy assessment plan for a client with complex problems/comorbidity.

3CD-FH. 111. The student can independently set up a physiotherapeutic assessment for a client with complex problems/comorbidity, based on casuistry descriptions.

3CD-E/FH. 159. Based on the findings from the physiotherapy assessment, the student can independently formulate a physiotherapy diagnosis.

3CD-E/FH. 183. Based on a case description, the student can independently draw up a physiotherapy treatment plan for a client with complex problems/comorbidity.

3CD-E/FH. 278. Based on a case description, the student can independently draw up a care-related prevention plan for a client with complex problems/comorbidity.

3BD-PH 22. The student can indicate within the multidisciplinary cooperation process how he takes into account different perspectives of colleagues, care recipients and their family, and other professionals such as those in municipalities, housing corporations, and the various disciplines within healthcare organisations.

INT 2CD-E/FH 4: On the basis of a case study, the student can independently justify the choices he/she makes in terms of physiotherapy using specialist literature written in English.

INT 3CD-E/FH 7: The student can incorporate information from specialist literature written in English into his/her clinical practice.

Inhoud

Employees have to work longer and experiencing more and more work pressure. The physiotherapist is important in analyzing and reducing mental and physical stress factors that are related to work. In addition, the physiotherapist is competent in different mental and physical stress-reducing techniques. During various previous courses, the student has gained experience in reduced participation by means of written cases. Within this course the student performs a work analysis at a person who works with complaints.

Also physiotherapeutic methods that can be applied to nonspecific musculoskeletal problems such as back pain, neck pain and shoulder pain, which often are workrelated, will be discussed.

Complex work-related health problems are also addressed. This enables the student to better respond to complex work-related complaints that put the sustainable employability of workers under pressure. Attention is paid to both acute complaints and care in the post-rehabilitation phase, in collaboration with other healthcare professionals

Opgenomen in opleiding(en)

International Physiotherapy
