

Vak: Thesis Research Project

credits: 30

Vakcode	SUVM23THP	Werkvormen	Werkvorm 1
Naam	Thesis Research Project	Toetsen	Thesis Research Project - Overige toetsing
Studiejaar	2026-2027		
ECTS credits	30		
Taal	Engels		
Coördinator	H.M. Moesker		

Leeruitkomsten

The Master thesis project is the graduation programme in which the student shows that they possess the qualifications of a Sustainable Energy System Management Engineer as defined within the Programme learning Outcomes on master level:

The programme learning outcomes comprise:

1. **Understanding of Techno-economical aspects:** The SESyM graduate is competent in analysing, assessing and applying techno-economical aspects of complex sustainable energy systems taking climate and resource issues into account
2. **Using appropriate tools and methodologies:** The SESyM graduate is competent in analysing, assessing, and applying relevant technical, (socio)economical, environmental, legal and policy aspects of systems of sustainable energy while using appropriate tools and methodologies.
3. **Specialism:** The SESyM graduate is competent in specific knowledge, insight and skills in at least one of the specialisation fields: system innovation management, sustainable energy management or sustainable energy and the digital transformation
4. **Project development:** The SESyM graduate is competent to plan, develop, monitor and manage small-scale sustainable energy projects
5. **Applied Scientific Research:** The SESyM graduate is competent in conducting applied research, by formulating a problem and knowledge gap, employing specific research methods, collecting relevant data, and drawing conclusions from the results achieved, showing a reflective and critical attitude towards the possibilities and limitations of the scientific methods used and the research outcomes.
6. **Critical View:** The SESyM graduate is competent to critically assess (inter)national developments, trends and ideas in society, policy, and to translate these innovations in professional practice and scientific study
7. **Project work:** The SESyM graduate is competent to timely achieve set goals in a(n) (international, multicultural and) multidisciplinary (project) team
8. **Communication:** The SESyM graduate is competent to communicate in a clear and structured way in both written and oral form to the client and other stakeholders, and in English to the scientific community
